“Delivering Mission-Ready Defense Solutions”

Vulcan Defense Solutions LLC delivers integrated logistics, supply chain management, and legacy systems sustainment solutions supporting the U.S. Department of Defense and the Defense Industrial Base. We help government agencies and prime contractors overcome supply chain challenges through responsive program management, strategic sourcing, production oversight, quality assurance and end-to-end logistics execution. Operating as a non-manufacturing prime contractor, Vulcan coordinates a nationwide network of OEMs, authorized distributors, and qualified manufacturing partners to provide build-to-print solutions, DMSMS mitigation, hard-to-source component procurement, and mission-critical sustainment that improves readiness and reduces supply chain risk.

CORE CAPABILITIES

- Defense Logistics & Program Execution
- Legacy Systems Sustainment
- DMSMS Mitigation
- OEM-Aligned Sourcing
- Build-to-Print Fulfillment
- Reverse Engineering Support
- Hard-to-Source Components
- Quality Assurance & Compliance

DIFFERENTIATORS

- Single Point of Accountability
- Operationally Proven Leadership
- Agile Supply Chain Solutions
- Established Manufacturing Network
- Robust Supplier Base
- Government Contracting Expertise
- Mission-Focused Leadership
- SDVOSB-Set Aside/Sole Source Pathways

KEY EXPERIENCE

- Over 20 years of leadership experience delivering on-time mission ready logistics, supply chain management, sustainment, and operational support solutions in complex, high-tempo environments.
- Directed integrated logistics and sustainment operations supporting activities at a 14,000-person contingency operating base (COB), ensuring uninterrupted mission execution and operational readiness.
- Managed a distributed supply chain network supporting 19 forward operating bases across an operational area the size of South Carolina, optimizing inventory, transportation, and material distribution.
- Certified Contracting Officer Representative (COR) with expertise in contractor oversight, performance management, quality assurance, regulatory compliance, and contract deliverable verification.
- Experienced in contingency logistics, operational planning, supply chain management, contractor oversight, and sustainment strategy supporting federal and Department of Defense mission requirements.
- Proven ability to coordinate government, military, and contractor stakeholders to deliver cost-effective, compliant, and mission-focused logistics solutions.
