

VULCAN

DEFENSE SOLUTIONS

RESPONSIVE | RELIABLE | COMPLIANT

DELIVERING MISSION-READY SOLUTIONS.

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS

WHO WE ARE

We operate as a non-manufacturer distributed program management company supporting legacy defense systems sustainment. Vulcan integrates OEM-aligned distributors, qualified machine shops, specialized manufacturers, and logistics providers through a centralized execution model, providing customers with a single point of coordination and accountability. By connecting the right suppliers and capabilities to each requirement, Vulcan helps customers reduce supply-chain risk, improve responsiveness, and maintain continuity of sustainment operations.

DIFFERENTIATORS

DMSMS MITIGATION- We keep defense programs moving when conventional supply channels fail- rapidly identifying qualified sources, validating suppliers, managing production and coordinating delivery of hard-to-source and critical components.

SINGLE POINT ACCOUNTABILITY- We provide a single point of coordination and accountability to facilitate communications and enhance supplier transparency throughout contract administration- reducing handoffs, delays and supply-chain risk.

VETERAN-LED LEADERSHIP- We bring the same operational urgency to the supply chain that our Veterans brought to the battlefield. Combining qualified sourcing, production oversight, and logistics coordination to deliver responsive, reliable and compliant solutions.

CORE CAPABILITIES

INTEGRATED PROGRAM MANAGEMENT

Transparent supplier integration and program oversight delivering visibility and accountability throughout contract execution.

DISTRIBUTED SUPPLIER & MANUFACTURING NETWORK

A qualified network of sourcing partners capable of delivering responsive, reliable and compliant solutions.

LEGACY SYSTEMS SUSTAINMENT

Expertise supporting aging platforms with hard-to-find parts, assemblies, and components.

OEM ALIGNED SOURCING & BUILD-TO-PRINT FULFILLMENT

Agile sourcing and precision manufacturing to OEM specifications and customer drawings.

QUALITY ASSURANCE & COMPLIANCE

Rigorous quality systems and compliance to meet or exceed military and industry standards.
